REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious the recited combination including the concepts of disposing a metallized dielectric filler comprising at least one conductive layer in a borehole with conductive walls, thereby forming a waveguide within the borehole in a support plate orthogonal to first and second transmission lines, converting signals between TEM and waveguide modes in the claimed manner.

U.S. Patent 4,779,031 to Lang et al shows a waveguide section [1] having a plurality of spaced coupling apertures [3]. U.S. Patent 4,741,589 to Halder et al describes a coupler for an optical waveguide [6] having a borehole [7]. U.S. Patent 4,661,787 to Lang discloses a waveguide [10] having a metallized layer [2]

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
